

Keurig® Commercial Brewing System Brew Count Procedure

B-K150P/150/155

1. With brewer in standby mode (brewer turned off, but still plugged in), press touch-screen anywhere and hold while pressing BREW button 3 times within 2 seconds. If done correctly, software version number will appear on the screen.
2. Depress the BREW button 2 times to advance to screen "Total Brew Count."
3. Depressing the BREW button 5 times from the software screen will show "Total Run Hours, 4 oz Brew Count, 6 oz Brew Count."
4. Depressing the BREW button 1 more time will advance the screen to "8 oz Brew Count, 10 oz Brew Count, and 12 oz Brew Count."
5. To exit this mode, either unplug the brewer from the main power supply, or cycle through all screens by pressing the BREW button.
